PROFESSIONAL SUMMARY

Results-driven Engineer with 3 years of experience supporting enterprise production environments and hands-on development experience in C#. Experienced in production debugging, root cause analysis, log analysis, and incident management in SLA-driven environments. Currently building an LLM-powered tool using the Anthropic Claude API (structured output, prompt engineering) to assist with game design documentation.

SKILLS

- | | | |
|---------------------------|-----------------------|-----------------|
| • Application Development | • Python | • SQL |
| • JavaScript | • C# | • System Design |
| • DevOps Practises | • React | • Unity Engine |
| • ITIL Process | • Agile Methodologies | • Unix |

WORK EXPERIENCE

HP CCC – Bangalore, India

2026

L1/L2 Technical Engineer

- Delivered L1.5 technical support for HP enterprise devices by diagnosing hardware and software issues, performing advanced BIOS/F2 diagnostics, OS recovery, and component-level troubleshooting to restore systems and minimize customer downtime.
- Performed technical troubleshooting and root cause analysis (RCA) using BIOS/F2 tools, OS recovery procedures, and hardware validation to resolve complex incidents, produce RCA findings, and reduce repeat failures.
- Maintained accurate technical documentation for incident resolution and customer communication in CDAX Genesys Cloud, supporting hardware asset tracking, service request workflows, and replacement coordination to preserve high customer satisfaction.

DXC Technology – Bangalore, India

2021 – 2022

Senior Technical Engineer

- Delivered enterprise application and technical support for a global user base, managing production incidents across Windows and Linux environments and troubleshooting authentication, infrastructure, and application issues while meeting strict SLA commitments.
- Owned the complete incident management lifecycle in ServiceNow, including ticket triage, technical investigation, root cause analysis, prioritization, escalation, and resolution documentation to stabilize post-deployment issues.
- Supported Microsoft Intune BYOD enrollment by assisting users with device registration, compliance, and secure access configuration to enable reliable remote access.
- Managed Active Directory user accounts, including access provisioning, group membership updates, and user account maintenance to support secure access controls.
- Administered endpoint management and MDM controls using Microsoft Intune, configured multi-factor authentication, and enforced enterprise access policies across distributed Windows environments.

MURATA VIOS Pvt Ltd – Bangalore, India

2020

Automation Engineer – Intern

- Developed Python and Bash automation scripts to streamline application migration, release management, and operational processes, reducing manual effort and improving deployment efficiency.
- Reviewed Ubuntu cloud migration processes and produced reports identifying inefficiencies and validating deployment workflow quality to improve operational reliability.

PROJECTS

[HoloLens Mixed-Reality Visualization – MSc Dissertation \(Unity, HoloToolkit\)](#)

- Designed and built a 3D stereoscopic data visualization app; planned and executed a full test cycle including live user testing and QA sign-off for a mixed-reality application.

[SuperShooter – 3D Wave-Based Shooter \(Unity/C#\)](#)

- Implemented core gameplay systems including enemy spawning, wave progression, player combat, and real-time game-state management.

[Galactic Action – Action Game \(Unity/C#, Solo Developer\)](#)

- Designed and debugged a finite-state-machine-driven enemy AI system, systematically resolving defects across AI, navigation, and combat logic.

[MacroTracker – Nutrition & Macro Tracking Web App \(React.js, Vite, JavaScript\)](#)

- Built and optimized a React-based nutrition tracking application, enabling users to log meals, monitor calories and macronutrients, and visualize progress through an intuitive interface.

EDUCATION

City, University of London MSc, Computer Games Technology,

2022 – 2023

- Relevant coursework: Project Management, Software System Design, Object-Oriented Programming in C++, Computer Games Architecture, Computer Graphics.

Atria Institute of Technology B.E., Information Science and Engineering,

2016 – 2021

- Relevant coursework: SQL, Unix and Shell Programming, Operating Systems, Computer Networks, Software Architecture.

LEADERSHIP & CUSTOMER EXPERIENCE

Camino Trading Company Pvt Ltd — London, United Kingdom

2023 – 2025

- Delivered high-quality customer support in a fast-paced retail environment.
- Resolved customer issues efficiently while maintaining a high level of customer satisfaction.
- Trained and mentored new team members on customer service processes and daily operations.
- Collaborated with team members to ensure smooth store operations and achieve service goals.
