PROFESSIONAL SUMMARY

Technical Engineer with 3 years of experience across enterprise and commercial environments. Skilled in JavaScript, React, Python, and modern AI frameworks, with hands-on expertise building LLM-powered applications and Retrieval-Augmented Generation (RAG) pipelines. Proven ability to translate complex logic into intuitive user experiences and excel in fast-paced engineering environments.

SKILLS

- | | | |
|-----------------|---------------|--------------------|
| • JavaScript | • React JS | • C# |
| • SQL | • python | • Game Development |
| • Unity | • API Testing | • ITIL Process |
| • RAG Framework | • Agentic AI | • LLM |

WORK EXPERIENCE

HP CCC – Bangalore, India

L1.5 Technical Support Engineer, 2026

- Delivered L1.5 technical support for HP enterprise devices by diagnosing hardware and software issues, performing advanced BIOS/F2 diagnostics, OS recovery, and component-level troubleshooting while managing incidents throughout the service lifecycle.
- Performed technical troubleshooting, root cause analysis (RCA), and advanced diagnostics using BIOS/F2 tools, OS recovery, and hardware validation to restore customer systems and minimize downtime.
- Maintained accurate technical documentation for incident resolution, customer communication, and service activities using CDAX Genesys Cloud, while supporting hardware asset tracking, service request management, and replacement workflows.

Camino Trading Company Pvt Ltd – London, United Kingdom

Leadership & Customer Experience (Sales), 2023 – 2025

- Delivered high-quality customer service in a fast-paced environment.
- Resolved customer concerns while maintaining high satisfaction.
- Trained and mentored new team members.

DXC Technology – Bangalore, India

Senior Technical Analyst, 2021 – 2022

- Delivered enterprise application and technical support for a global user base by managing production incidents, troubleshooting hardware, software, authentication, and infrastructure issues while meeting strict SLA commitments.
- Owned the complete incident management lifecycle in ServiceNow, including ticket triage, technical investigation, root cause analysis, issue prioritization, escalation, and resolution documentation.
- Supported microsoft intune BYOD enrollment by assisting users with device registration, compliance, and secure access configuration.
- Managed active directory user accounts, including access provisioning, group membership management, and user account maintenance.
- Administered Microsoft Intune, endpoint management, mobile device management (MDM), multi-factor authentication, and enterprise access controls across a distributed Windows environment.

MURATA VIOS Pvt Ltd – Bangalore, India

Automation Engineer – Intern, 2020

- Developed python and bash automation scripts to streamline application migration, release management, and operational processes, reducing manual effort and improving deployment efficiency.
- Conducted reviews of Ubuntu cloud migration processes and generated reports to identify inefficiencies and validate deployment workflow quality.

EDUCATION

City, University of London MSc, Computer Games Technology, 2022 – 2023

- Relevant coursework: Project Management, Software System Design, Object-Oriented Programming in C++, Computer Games Architecture, Computer Graphics.

Atria Institute of Technology B.E., Information Science and Engineering, 2016 – 2021

- Relevant coursework: SQL, Unix and Shell Programming, Operating Systems, Computer Networks, Software Architecture.

PROJECTS

[HoloLens Mixed-Reality Visualization – MSc Dissertation \(Unity, HoloToolkit\)](#)

- Designed and built a 3D stereoscopic data visualization app; planned and executed a full test cycle including live user testing and QA sign-off for a mixed-reality application.

[SuperShooter – 3D Wave-Based Shooter \(Unity/C#\)](#)

- Designed and debugged a finite-state-machine-driven enemy AI system, systematically resolving defects across AI, navigation, and combat logic.
- Migrated the project across a Unity engine version upgrade, validating existing systems against breaking changes.

[Galactic Action – Action Game \(Unity/C#, Solo Developer\)](#)

- Designed and debugged a finite-state-machine-driven enemy AI system, systematically resolving defects across AI, navigation, and combat logic.
